DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a method of determining activity and ageing behavior of a catalyst.

Group II, claim(s) 13-19, drawn to an apparatus for determining the activity and the aging behavior of a catalyst.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical features for groups I and II are two burners producing hot combustion exhaust gas flows to combine and feed to the catalyst to test the aging behavior of the catalyst as recited in claims 1 and 13. These technical features are known in the art, e.g. Adams et al. (US2001/0054281, IDS) teaches a burner producing the first hot combustion exhaust gas flow and feed to the catalyst to test the aging behavior of the catalyst (see abstract). Adam also teaches additional exhaust gas flow can be added to the first exhaust gas flow by a contaminant supplier (see paragraph [0037]). Therefore, the second exhaust gas flow being generated by a second burner would be obvious to ordinary skill in the art. Thus, two burners producing hot combustion exhaust gas flows to combine and feed to the catalyst to test the aging behavior of the catalyst is well known in the art, and therefore, is not a special technical feature. This makes the restriction requirement proper.

3. A telephone call was made to William D. Schmidt on 2/2/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1797

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
